Dear Resident,

The purpose of this notice is to inform you that the City of Alexandria, Department of Transportation and Environmental Services has contracted our company to rehabilitate the City's sanitary sewer line that services your property utilizing the Cured- In- Place- Pipe (CIPP) process. This process decreases the disruptions associated with excavation and replacement.

This work is scheduled to start on March 30, 2009 and will continue daily for approximately six weeks. The work entails rehabilitation of the 15" sanitary line that starts from the front of the Recreation Center and continues towards West Taylor Run Parkway along Taylor Run. The front of the Recreation Center will be used to mobilize and place the by-pass pumps. The by-pass will be carried in a 12" pipe running along the back of the sidewalk along King Street towards the First Baptist Church. The by-pass pipe will then be routed behind the church and will cross Taylor Run just north of the West Taylor Run Parkway. The above work will be considered the first phase of a four phase construction that will eventually allow the pipe to be rehabilitated to the Railroad ROW south of Duke Street. During the first phase you can expect to see right hand lane closures on a daily basis in front of the Recreation Center to the Church. You will receive a follow up notice when we begin the rehabilitation process as to dates and times.

Am-Liner East Inc. along with the Engineer and the City will do everything in its power to minimize the impact to the surrounding area while proceeding as quickly as possible so that your area and the park can resume its normal activities. Please follow the directions of any signs that are posted. They are placed for your safety.
